TRANSPORTATION SCIENCE

the publication of
Transportation Science Section
of ORSA

A quarterly journal dedicated to the publication of scientific papers on the increasingly urgent and complex problems of transportation. The journal caters to the theoretical and experimental findings which result from the use of scientific methods, particularly those of operations research. It encompasses all modes of transportation and inter-modal problems, and demonstrates that transportation systems and their elements comprise phenomena which may be studied using theories, mathematics and experiments.

Every person with a technical background and with responsibilities for the planning, functional design or operation of transportation systems can be kept up to date by knowing the contents of the papers published in TRANSPORTATION SCIENCE. The journal reports on the most significant aspects of recent technical work accomplished throughout the world in this field.

Published since 1967 by the Operations Research Society of America under the direction of its Transportation Science Section. Available at the following rates per annual volume:

<table>

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
(Act of August 12, 1970; Section 3685, Title 39, United States Code)

I. TITLE OF PUBLICATION: Technometrics

II. FREQUENCY OF ISSUE: Quarterly (February, May, August and November)

III. LOCATION OF KNOWN OFFICE OF PUBLICATION (Street, City, County, State, ZIP Code) (Note: pranrls)
Wm. Byrd Press, 2901 Byrdhill Rd., P.O. Box 27481, Richmond, Va. 23205

IV. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHER (Not printer):
806 15th St., N.W., Suite 640, Washington, D.C. 20005

V. NAME AND ADDRESS OF PUBLISHER, EDITOR, AND MANAGING EDITOR:

VI. NAME AND ADDRESS (Note: if owned by a corporation, its name and address must be stated and also immediately thereafter the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given):

American Statistical Association
806 15th St., N.W., Suite 640, Washington, D.C. 20005

American Society for Quality Control
161 W. Wisconsin Ave., Milwaukee, Wis. 53203

VII. VACATING HONDOHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PERCENT OR MORE OF TOTAL AMOUNT OF BONDS, MORTGAGES OR OTHER SECURITIES (If there are none, so state)

Name

Address

VIII. FOR OPTIONAL COMPLETION BY PUBLISHERS MAILING AT THE REGULAR RATES (Section 332.121, Postal Service Manual):

IX. FOR COMPLETION BY NONPROFIT ORGANIZATIONS AUTHORIZED TO MAIL AT SPECIAL RATES (Section 332.122, Postal Service Manual)

X. EXTENT AND NATURE OF CIRCULATION

XI. I certify that the statements made by me above are correct and complete.

Edgar H. Bigger, Business Manager
STATISTICAL THEORY AND METHOD ABSTRACTS

(A Journal of the International Statistical Institute)

The object of this service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars; technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; language of the original paper is indicated. Headings give the name and address of the author together with Journal in which the paper is published; moreover, a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages are colour-tinted in accordance with these main sections. Each is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in each issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

Special annual subscription rate for members of the AMERICAN STATISTICAL ASSOCIATION or members of the INSTITUTE OF MATHEMATICAL STATISTICS in North America—$15.00.
