Homework 11: Project Preliminary Report

36-350, Fall 2012

Due at 11:59 pm on Thursday, 29 November 2012

Instructions: Write a preliminary report for your project, of between 1 and 3 pages, either plain text or PDF (not word). The report should do the following (not necessarily in this order):

- Explain what problem you are trying to solve;

- Describe the data set (if any);

- Explain what a successful solution consists of (i.e., how you know you've won);

- Outline your plan for solving the problem;

- Describe how you and your team-mates will divide up the work and collaborate;

- Any work done so far.

Coming up with a plan of work now is intended to help guide your efforts, rather than constrain you unrealistically; if you need to revise the plan later, do so.

You can and should *discuss* these things with your team-mates, but you must submit your own write-up.
